EDUCATION

Kaziranga University

B.Tech - Computer Science and Engineering - **CGPA: 8.17**

2022 – 2026

Assam, India

EXPERIENCE

DeeGee Techlytics Solutions Pvt. Ltd.

June 2025 – August 2025

Software Development Intern

Remote

- Enhanced **CRM system** and **WhatsApp Cloud API** features, optimizing workflows for 5+ client projects and improving system efficiency by 20%.
- Applied **SDLC** and **Agile methodologies** across 3+ software projects, improving team productivity by 25%

Subspace.Money

July 2024

Full-Stack Developer Intern

Remote

- Developed a collaboration platform for remote teams, implementing automation workflows that improved task efficiency by 30%.
- Integrated **N8N** with a **React**-based frontend, streamlining automation tasks for end-users.
- Gained hands-on experience in full-stack development, API integration, and workflow automation, enhancing system reliability and user productivity.

PROJECTS

Real-Time Poll Rooms | Node.js, Express, Socket.io, MongoDB, React

2026

- Built a **real-time polling platform** enabling dynamic room creation and live vote synchronization across multiple concurrent clients using **WebSockets (Socket.io)**.
- Resolved race conditions using **atomic MongoDB updates** and server-side validation, ensuring consistent vote counts under concurrent access.
- Designed scalable **REST APIs** and optimized database queries to reduce response latency and improve poll retrieval efficiency.
- Implemented **duplicate vote prevention**, fair-voting logic, and backend-level authorization controls for secure participation.

ByteClean | Java, Spring Boot, SHA-256, File System API, Drools

2025

- Engineered a **duplicate file detection system** using **SHA-256 hashing** for collision-resistant file fingerprinting and accurate comparison.
- Implemented **rule-based categorization** using Drools, extension matching, filename similarity, and metadata parsing for intelligent file organization.
- Designed modular backend services with **Spring Boot**, improving maintainability, scalability, and testability.
- Integrated structured logging to track duplicate detection and cleanup operations efficiently.

YouTube Video Summarizer | React, Node.js, N8N, Appwrite

2024

- Developed an automated video summarization system integrating **N8N workflows** with a **Node.js backend** to process and generate structured summaries.
- Designed REST endpoints to handle asynchronous processing and third-party API integrations.
- Implemented authentication, secure summary storage, and user-based history tracking using **Appwrite**.

Project-Bhasha | Python, OpenCV, NLP, Flask, Express.js

2023

- Developed an **OCR-based multilingual text extraction system** using OpenCV and NLP models to process images and PDFs.
- Integrated **Flask-based ML services** with an **Express.js backend**, enabling seamless API communication between model and application layer.
- Improved recognition accuracy and reduced processing latency through optimized image preprocessing and request handling.

EasyRent | Next.js, MongoDB, Express, Tailwind

2023

- Built a **full-stack rental property platform** supporting secure authentication and property CRUD operations.
- Optimized MongoDB indexing and query performance to improve property search efficiency and reduce data retrieval latency.
- Integrated cloud-based media storage for scalable and efficient image handling.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frameworks/Tools: Node.js, React.js, Express.js, Next.js, MongoDB, PostgreSQL, Prisma, n8n, Tailwind CSS

Developer Tools: VS Code, IntelliJ IDEA, GitHub, Docker

CERTIFICATIONS

- Java – Udemy
- JavaScript – Infosys
- Web Development – Microsoft
- Machine Learning – AWS Academy

ACHIEVEMENTS

- Qualified for the final round of the **IBM National Hackathon** (Bangalore).
- Active participant in **national and university-level coding competitions and hackathons**.
